

Ensure Optimal Performance with Rees' Calibration Services

Recognizing the critical role of precise temperature control in GxP-regulated environments, Rees' CTU Calibration Services are expertly crafted to ensure your controlled temperature units maintain optimal performance and adhere to the strictest regulatory standards.

WHY OPT FOR REES' CALIBRATION?

Accuracy Assurance

- Rigorous calibration process ensures accurate and precise temperature readings.
- Essential for maintaining the integrity of temperature-sensitive materials like pharmaceuticals, research, blood, and clinical samples.

Regulatory Compliance

- Calibration to meet or exceed requirements of FDA, WHO, and CDC.
- Follows regulatory guidelines outlined in GxP, ISO 17025, and 21 CFR parts 210 and 211.
- Supports commitment to highest standards of product quality and safety.

Comprehensive Calibration Certificates

- Calibration certificates with as-found and as left results includes documentation of calibration date, due date, and NIST standards used.
- Essential for GxP audit readiness.

Expert Technicians

- Highly skilled technicians with NIST traceable standards.
- Deep industry knowledge and commitment to precision.
- Ensures reliable and efficient performance of your equipment.

EQUIPMENT WE CALIBRATE:

- Refrigerators
- Freezers
- Incubators
- Cold Rooms
- Ultra-Low Temperature Freezers
- Environmental Chambers
- Stability Chambers
