## Continuous Temperature Monitoring

Rees Scientific has received an (RMF) Risk Management Framework with the Authority to Operate (ATO) on all military networks (DHA).

### Advantages of Our Automated Monitoring System:

- RMF is authorized by Defense Health Agency (DHA) and Department of Defense (DoD)
- Helps meet compliance in FDA, USP <797>, USP <800>, GxP, GMP, AABB, Joint Commission, AAALAC, USDA and more
- Preserves time, saves energy and resources
- Provides full software validation and on-site IQ/OQ
- Has the industries most sophisticated telephone alarm notification as well as escalating e-mail and text messaging
- Reduces loss and minimizes exposure to risk
- Generates user-defined reports based on time, date or activity
- Provides a secure encrypted SQL or Oracle Data Engine utilizing crystal reports

## Continuous Temperature Monitoring

Rees Scientific has been servicing the military for over 40 years. We value our relationship with the military and are thankful for their services. Our goal is to provide them with a data enriched and quality automated monitoring system. We want to help ensure safety and avoid risk by making sure all critical refrigerators, freezers, incubators and other medical equipment/assets are monitored and maintained at all times.

### How our system works
