Stay VFC Compliant with Continuous Vaccine Temperature Monitoring

Meet CDC VFC requirements with real-time visibility, audible alarms, min/max temperature tracking, and secure data storage, all displayed directly at the vaccine storage unit.

Why Facilities Choose Our LCD Module

- Effortless Vaccine Compliance
- Meets and exceeds CDC VFC requirements for temperature monitoring, alarm capability, and data storage.
- Built for 503A, 503B, and USP <797>/<800> Compliance
- Monitor cleanroom temperature, humidity, and air changes per hour with confidence.
- Visual and audio alarms, plus real-time data on screen, so staff know what to do
- Flexible Connectivity Options
- Available in WiFi or Zigbee. Compatible with existing Centron hardware and Rees Cloud.
- Simple & Smart Sensor Monitoring
- View min/max sensor data, graphical trends, and download event logs right from the module.

Perfect for:

- Hospital & Clinic Pharmacies
- Specialty & Compounding Pharmacies
- Vaccine Storage Rooms
- Cleanrooms & Critical Care Areas
